

IN THE ABSTRACT:

Please delete the present Abstract of the Disclosure and replace it with the following new Abstract of the Disclosure.

b3
Telecommunication systems, which includes a controller (gateway/server), devices (TV, VCR, refrigerator, security system) and a remote control unit for remotely controlling the devices via the controller, is made more flexible and more user-friendly by allowing an interface like a user-interface and/or a device-interface to be downloaded into the remote control unit, in response to a trigger-signal comprising a user-identification and/or a device-identification generated due to a user operating the remote control unit or generated due to an interface-amendment reported to the system.
